### Testimony

Schools should be one of if not the safest place for a child or young adult. Anyone who threatens a school immediate creates fear and anxiety in these children, the staff and the families of all involved. Threats of any kind are taken very serious causing immediate reaction by local law enforcement and families. Any and all threats to these institutions are a horrible act psychologically and a waste of local law enforcement resources. These individuals should be prosecuted very heavily and set as an example every single time to show others it's not ok to do.
